

# Using Your Computer To Edit Patches

Inside the CD-ROM that came with your MAGICSTOMP, are a variety of patches (**in a library file format**) that are in addition to the preset patches (P01-P99) installed in the MAGICSTOMP unit. Also found in the CD-ROM is the “**Sound Editor for MAGICSTOMP**” application, which lets you freely edit parameters that can not be controlled by the MAGICSTOMP.

To truly get the most out of your MAGICSTOMP, use your computer to access its full potential.

**Before opening the CD-ROM, make sure you read the “Software Licensing Agreement” section in the MAGICSTOMP’s Owner’s Manual.**
