

# Magicstomp Quick Guide

## Plug In, Power Up, and Play

### Power

No switch, just plug in the AC adaptor to turn ON the Magicstomp.

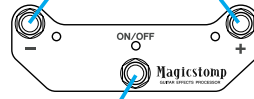

### Turn It Up

The VOLUME knob sets the overall output level.

### Pick a Patch

The "-" switch decreases the patch number. The "+" switch increases the patch number.

Use the ON/OFF switch to bypass the effect.

\* Hold either the "+" or "-" switch to scroll through patch numbers faster.

### Patch Flow

99 User Patches and 99 Preset Patches

User Patches [U01-U99]

Preset Patches [P01-P99]

U01 U02 U03 ··· U11 U12  
U13 ··· U97 U98 U99 P01  
P02 ··· P99 U01 (cycles back to the top)

## Easy Patch Tweaking

Patch No. Patch Name

P01▶HeavyHiGain  
GAIN▶STR▶TONE

Assigned knob functions

Use the knobs to adjust parameters.

P01▶HeavyHiGain  
GAIN▶STR▶TONE

Graphics indicate current value.

Rotate the knob to adjust parameter.

### Current parameter value.

First align the knob position with the displayed value, then graphics will change in real-time to indicate the knob's current value and position.

## Save Your Patches
